Timber products should be protected whilst in store to prevent water saturation, this will assist in preventing sagging or twisting of the material.

SRT Treated Softwood Timber products are available in various lengths ranging from 2.4m up to 5.4m, in 300mm increments. Carcassing is available from 2.4m up to 6.0m in 600mm increments.

Produced from imported spruce (Whitewood) Abies Alba/Picea abies – WPCA or pine and (Redwood) Pinus sylvestris – PNSY or combined, all supplied as either FSC® Mix or PEFC, from fully certified or controlled wood resources. Ask for our certified products when placing an order.

High pressure Tanalith E preservative treated to use class relevant to the product type, as in accordance with recommendations given in BS 8417:2011+A1:2014. All SRT Treated Softwood Timber products carry our standard 60 year service life certification, against insect attack and wood rotting fungi (when used correctly and installed above dpc level in buildings).

We recommend that gloves are worn at all times when handling timber products.

SR Timber, Nunn Brook Road, Huthwaite, Sutton-in-Ashfield, Nottinghamshire, NG17 2HU
